This document shows some mesh examples viewed by FER/View (release 4.0), an interactive finite element post-processor.

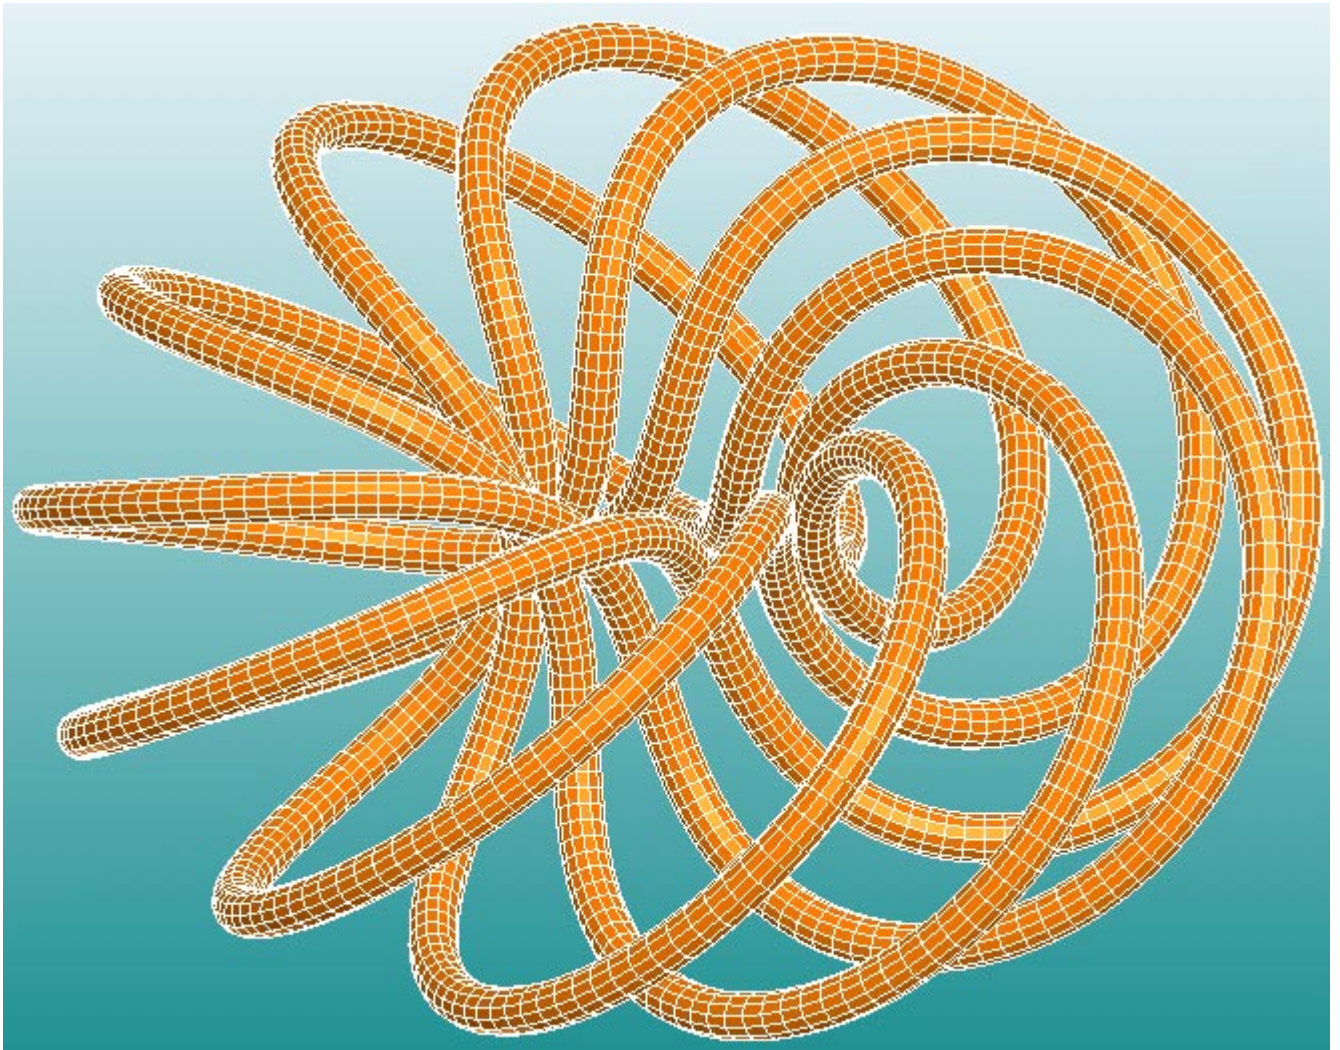

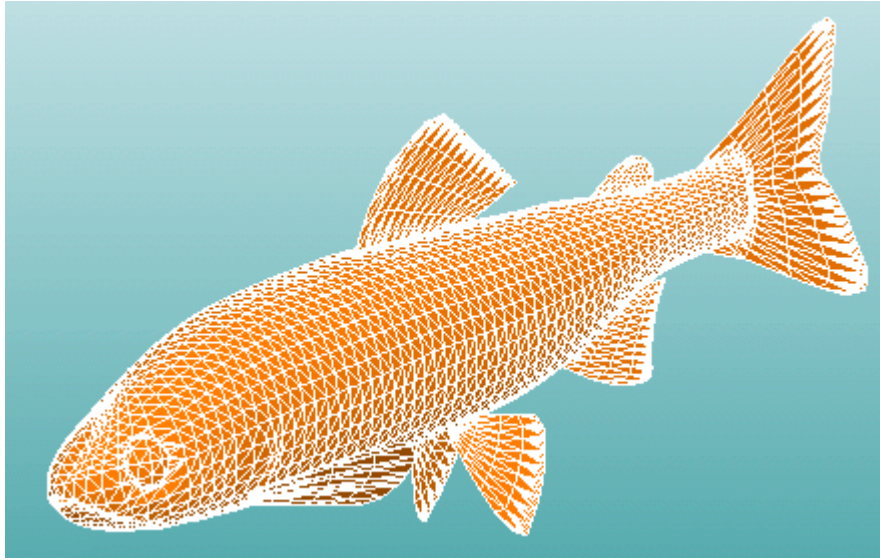

For more information, see <http://gmfe16.cemif.univ-evry.fr:8080/~feng/Ferview.html>.

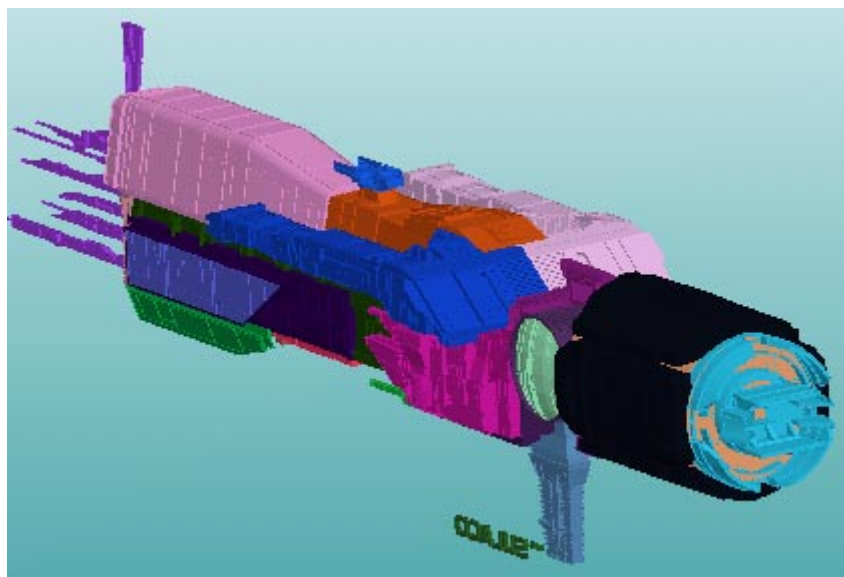

FER/View3.0 can be downloaded from the site: <http://gmfe16.cemif.univ-evry.fr:8080/theme1.html#7>

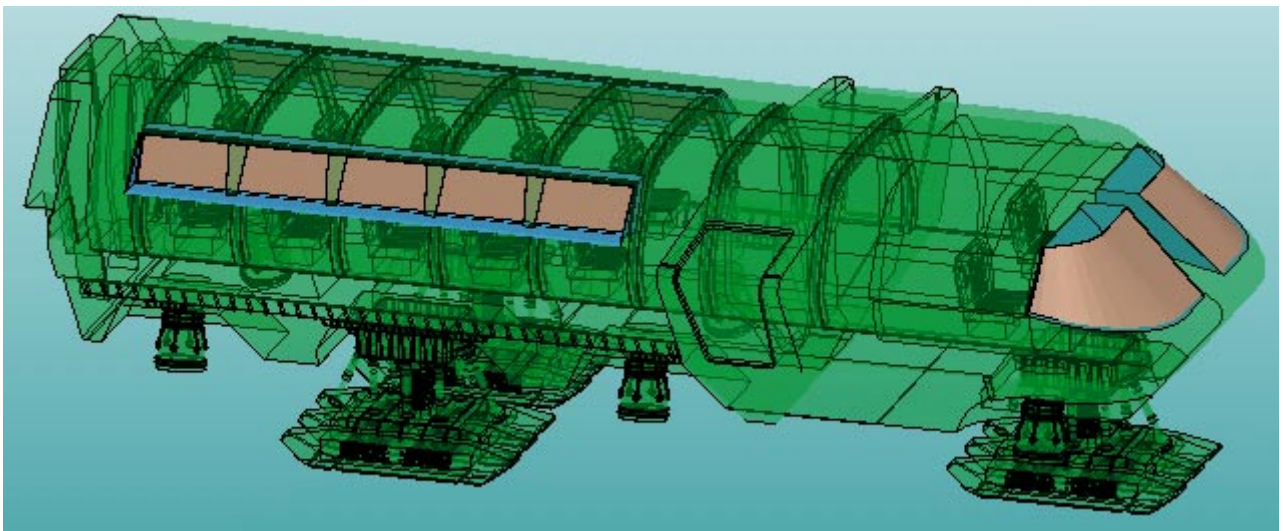

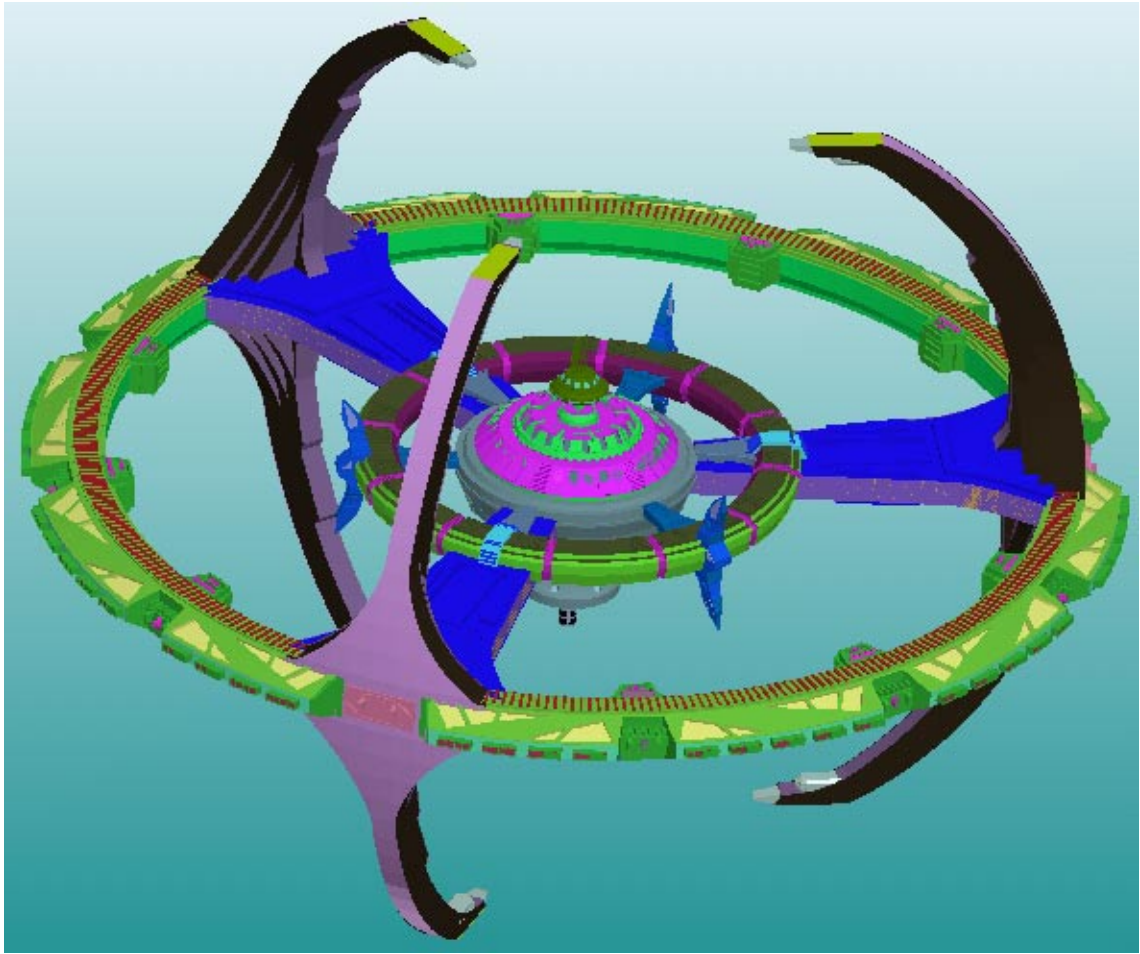

The mesh models (with a format .mesh) are downloaded from the site of INRIA:

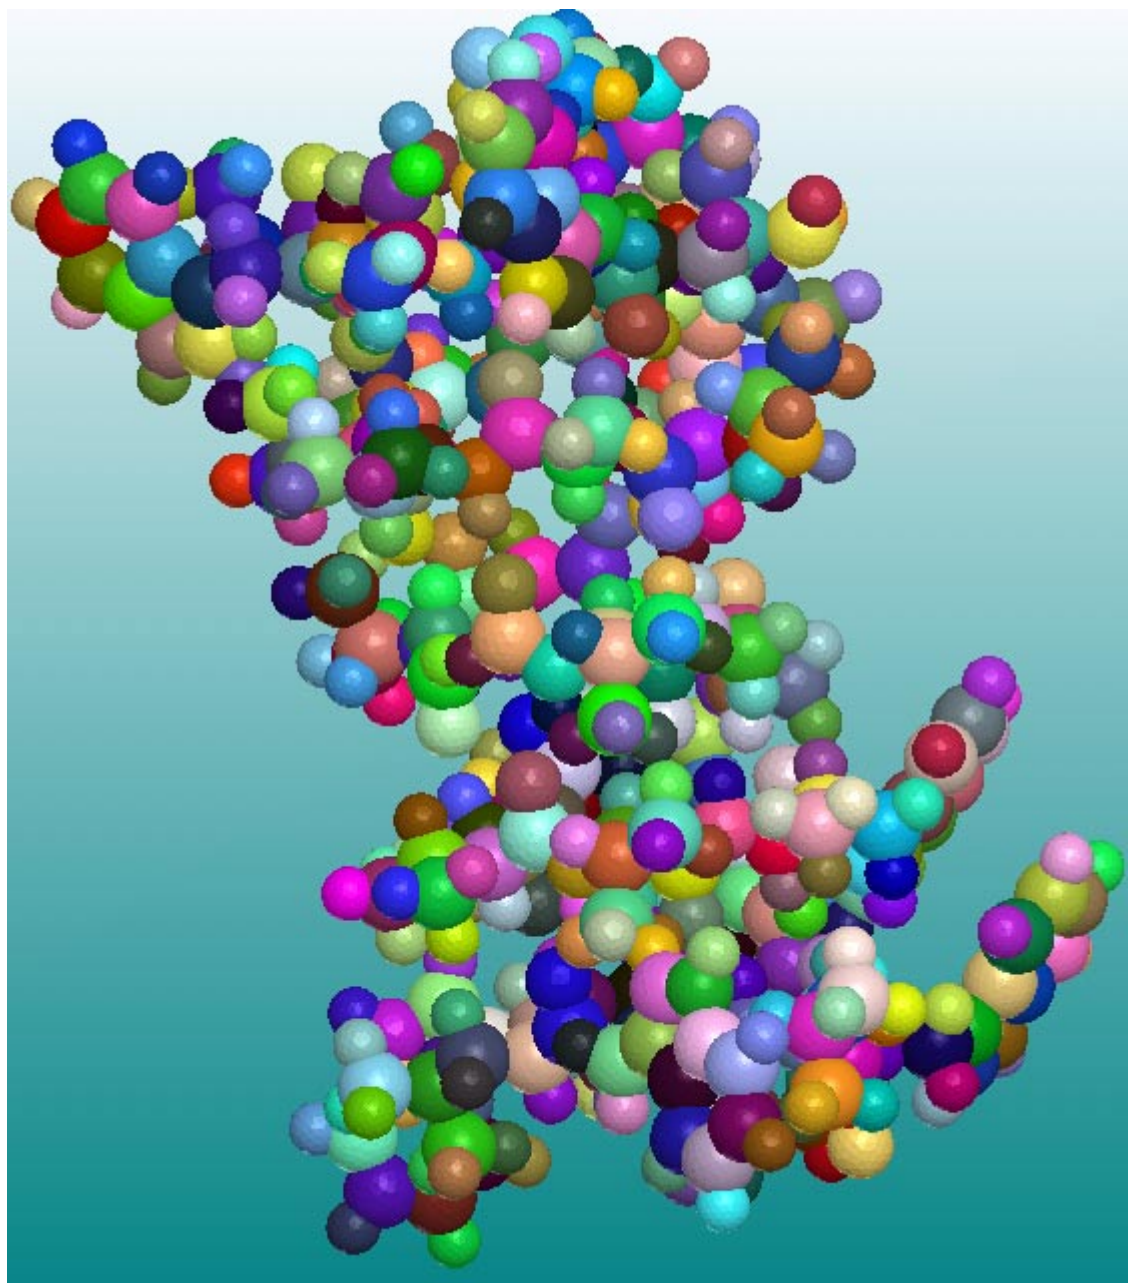

<http://www-rocq1.inria.fr/Eric.Saltel/download/>

The biggest model viewed by FER/View

Number of nodes : 1329865
Number of elements : 2673604
